-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. This action is in response to applicant's amendment filed on January 13, 2009. Claims 1-49 are still pending in the present application.

***Election/Restriction***

2. Applicant elected claims 1-28 in response to examiner's request for Election/Restriction in the Office Action dated 30 December 2008. However, after further search and study of the claims, the examiner finds the claims subject to further restriction for the reason mentioned below. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-13**, drawn to a device and system providing an interface that allows a user to initiate a connection by using tags where each tag is associated with a network address, classified in class 455, subclass 418.

II. **Claims 14-32**, drawn to a network, device, and method comprising a mobile device having multiple characteristics of operation, where the characteristics of operation is dependent upon and selected based on the location of the device location detection, and associating locations with mobile device characteristics defining themes for controlling the device, classified in class 455, subclass 456.1.

III. **Claims 33-49**, drawn to a device and method having multiple themes, where the user of the device selects the an option when one of the themes is adopted by the electronic device and another themes, by the mobile device, defines how an electronic device is controlled by user input, classified in class 455 subclass 67.11.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as allowing a user to initiate tagging web addresses and starting a connection by using tags, while invention II has multi mode operability of a device based on location and location based features, and invention III discloses automatic functionalities of the a device and it allows the user to selects the an option when one of the themes is adopted by the electronic device and another themes, by the mobile device, defines how an electronic device is controlled .See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for one of the groups is not required for the other groups, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Douglas Goldhush on May 21, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
